

European Association for
Developmental Care

5th Scientific Symposium

1st-2nd October 2015
Brescia (Italy)

Università degli Studi di Brescia
Aula Magna di Medicina
Viale Europa 11

Under the patronage of

The field of child development is evolving and requires reflections and adaptations for professionals involved in the care of children and families.

In particular, "Early developmental care" is a relatively new approach becoming even more important and scientifically supported in recent years.

During these days we will aim to facilitate learning, discussion, and exchange about the "Early Developmental Intervention" and its implications, while providing many opportunities for networking.

The symposium aims to showcase the top research and developments in European developmental care.

Indeed, a constant questioning is necessary, so that the different partners have current knowledge in the field of child development.

In addition, the coordination of care, in order to harmonize attitudes and to create coherence for the benefit of children and support for families, is our challenge

Join us in Brescia on 1st-2nd October 2015.
